

Admitted: relations dated up to 1899

Pre-1900 corpus

dimensionless reductions $y = f(x)$ of pre-1900 laws,
sampled as point clouds

↓ split by law family

Training

3,441 relations
in 91 law groups

Calibration

91 held-out
formulas

Test

held-out
formulas

↓ grouped by mechanism

Pre-1900 control groups

original: 9 groups of test formulas
regenerated: the same 9 groups resampled
with the later families' sampling

Used only for evaluation

Later law families

55 families after 1900
(38 from 1901–1950,
17 after 1950)

Same-generator set

later formulas produced by
the generator of the training
corpus (1901–1950)

Measured data

historical datasets and
16 NIST series in
14 mechanism groups
